

Short Run Card Wallet

key	—	cutter guide
	- - -	fold
	■	bleed

Notes

Artwork can be accepted in .EPS, .JPG (use maximum quality compression), .TIF, .PDF (print-ready), .QXD (QuarkXpress), .INDD (InDesign), .PSD (Photoshop), .AI (Illustrator) formats.

- All linked images must be embedded or included.
- All must fonts are included, embedded or outlined.
- Where possible, leave vector artwork and fonts un rasterized as this often produces a 'cleaner' print.
- All Pantone® colours should be clearly indicated.

Pixel-based files should be supplied at a minimum of 300dpi and saved as CMYK image mode. Any files supplied in a lower resolution or different colour format (ie RGB) may not print correctly.

- Please allow for a 3mm bleed around the edge of your artwork and place all text or important imagery at least 2mm from the document edge.
- Please do not flatten or merge the template with your artwork as we will not be able remove it.

Finished artwork files under 10MB can be emailed directly to us.

If your files are over 10Mb in size, please upload the files to web-based FTP service
